LORAN-C OPERATIONS, LORAN STATION SENECA STATUS

The Coast Guard proposes to authorize Loran Station Seneca (Rate 9960-M/8970-X) off-air time from 1400Z to 1600Z on July 15, 1997. The alternate time will be from 1400Z to 1600Z on July 17, 1997. Objections will be considered until 1600Z, July 08, 1997. Users shall address inquiries to the Northeast Coordinator of Chain Operations at (607) 869-1334. Current Loran-C status is available 24 hours-a-day through an electronic bulletin board system (BBS) at (703) 313-5910, baud rate 300 to 28,800. The communication parameters are eight bit word, one stop bit, no parity. Internet Address: <HTTP://WWW.NAVCEN.USCG.MIL>, <FPT://FTP.NAVCEN.USCG.MIL>.

Changes to the Coast Guard Navigation Information Service

The Coast Guard Navigation Information Service (NIS), formerly the GPS Information Center (GPSIC), has an electronic way you can receive the Local Notice to Mariners (without enclosures). The Bulletin Board Service (BBS): The LNM's will remain on the BBS for approximately one year. To access the BBS, call (703)313-5910; 300 to 28,800 bps, 8 data bits, no parity, 1 stop bit. You will be able to access the LNMs via INTERNET. If you have any problems accessing the information or have any comments, please call the NIS watchstander at (703)313-5900; 24-hours-a-day, 7-days-a-week.

HURRICANE SEASON

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;

- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watch on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING - which indicated that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricanes and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

SLOW SPEED ZONES/NATIONAL PARK SERVICE

Biscayne National Park has extended the deadline for public comment on proposed slow speed zones in the vicinity of the Safety Valve and Sands and Elliott Keys in order to accommodate those who may have missed the original deadline. The new date is June 27, 1997. Additionally, a public meeting on the proposal will be held at 7:00 p.m. on July 23 at the Biscayne National Park Visitor Center Auditorium, 9700 SW 328 Street in Homestead.

The idea for the speed zones was proposed by a South Dade boating club in order to address safety concerns in and around popular anchorages near the park's islands. Many are in support of the entire proposal and several have indicated that the proposal does not go far enough in protecting park resources. At the opposite end of the spectrum, many feel that better ways to deal with the problems are to increase enforcement of existing regulations, increase marking of the shallow areas for resource protection, and increase boater education efforts, including operator licensing.

On a typical weekend the areas included in the proposal host scores of boaters engaged in a variety of activities, including swimming, snorkeling, water skiing, fishing, and personal watercraft use. Many of these activities are incompatible with one another and have led to serious personal injury and property damage. The proposal's primary objectives are to decrease the threat of serious vessel accidents, to increase visitor safety by providing a safer area for anchored vessels and in-water recreational activities, to separate incompatible water-based recreational activities, and to protect shallow seagrass habitat.

Written comments on the proposal should be direct to: Superintendent; Biscayne National Park; P.O. Box 1369; Homestead, Florida 33090-1369.

FLORIDA-SEACOAST-BETHEL SHOAL TO JUPITER INLET-PORT EVERGLADES: U.S. Navy Operations.

The U.S. Navy has established a simulated mine field composed of approximately 38 moored and bottom inert units which will remain in the water for approximately two years. Minimum case depth of the moored units is 600 feet below the surface. The area is bounded by: 26°01'00.0"N 079°53'00.0"W, 26°05'00.0"N 079°53'00.0"W, 26°01'00.0"N 080°01'00.0"W, and 26°05'00.0"N 080°01'00.0"W.

FLORIDA-DRAWBRIDGES: VHF-FM Channel Change.

Drawbridges owners/operators in Florida have been encouraged by the Federal Communication Commission to use VHF-FM channel 9 for communications with vessels instead of VHF-FM channel 13. This is an attempt to reduce the congestion of VHF-FM channel 13 which is intended for vessel to vessel passing information. When using VHF-FM channel 9, all vessel operators and bridgemanagers are encouraged to switch to low power for hailing or discussing bridge opening information; this will help minimize confusion for boaters especially on waterways with a large number of drawbridges located in close proximity.

IV. CHART CORRECTIONS

(Explanation of Format)

Corrective action, affecting charts, is contained in this section. Chart corrections are listed numerically by chart number, beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. It is up to the mariner to decide which charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition number	Edition date	Last Local Notice to Mariners	Reference datum	Source of correction	Current Notice to Mariners
11534	26 th	ed. 12/14/91	Last LNM 41/92		NAD 83(CG7)	06/93
(Temp) Myrtle Grove Sound to Fear River to Casino Creek						
Add Boguse Channel Light 1, Fl G 2.5s, 16 ft, 7M						
32°48'00"N						
79°15'00"W						
Corrective action		Object of corrective action		Position		

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. (Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (M).
